

epi-me Release Notes

Date of Release	22 nd of March, 2022
-----------------	---------------------------------

BUGS:

Cardiac Surgery Question unable to be clicked on Safari x Mac:

There was an issue identified with the Cardiac Surgery Question located on Page 3 of epi-me's health History forms, where users were unable to select an answer when completing their online admission forms using either Safari internet browser, or Apple devices. This issue has now been resolved.

Congestive cardiac failure * ☒ No ☐ Yes

Cardiac surgery eg: pacemaker, implants or devices, prosthetic heart valve, grafts, stents * ☐ No ☒ Yes

Vascular disease eg: carotid disease, aortic aneurysm, peripheral vascular disease * ☒ No ☐ Yes

Reminder email going to Patient not User

Epi-me user's identified an issue with notifications emails being sent from epi-me. Notification emails were being sent to the patient's email address, and not the email address linked to the user's account. This issue has now been resolved, and notification emails are being sent as expected.

Procedure Date was not displaying correctly on Admission Details page

The Procedure date field was saving the correct date in the database, but was not displaying correctly when navigating back to the Admission Details page. The data in this field was still populating the export correctly and was displaying correctly on the PDF. This view issue has been fixed.

A screenshot of the "Admission Details" form in the EpiSoft system. The form is titled "Admission Details step 1 of 8" and "Clinical History Form". It shows patient information: "Patient: ABRAMS, Andrea (F) DOB:20/06/1991". The form includes fields for "Type of Admission" (Overnight), "State" (VIC), "Please select your hospital for admission" (EpiDemo Hospital 1), "Please specify the procedure or reason for this admission", "Admission Date" (23/03/2022), "Procedure Date" (30/03/2022), and "Room Type". A note at the bottom states: "Whilst every effort will be made to provide the room type you have requested, this may not always be possible." The EpiSoft logo is visible in the top left corner.

Neurological Section printing truncated on General Health History PDF:

The Neurological section on the Health History PDF was printing in a truncated format to the side of the page. This was then fixed.

MACSORLEY, Erin (F), 19/07/1984		History Form

Dementia / memory loss / Delirium	No	
Speech / swallowing problems	No	
Brain infection or inflammation	No	
Other neurological	No	
BONE AND JOINT		
Arthritis	No	
Joint replacements	No	

MBS Item numbers able to be edited once the Admission form was Submitted:

An issue was identified on page 1 of epi-me's Admission Forms. Patient's/Users and hospital staff were able to open the Admission details page after the Admission form was submitted, and then enter or change MBS item numbers. This resulted in the form not able to be saved as it was in a status of 'Submitted'

The screenshot shows the 'Admission form' page 1. It includes fields for 'Admitting Dr's surname', 'Admitting Dr's first name or initials', 'Admitting Dr's suburb', and 'Admitting Dr's postcode'. Below these is a section for 'MBS Item Numbers' with a '+ Add Item Number' button. A red arrow points to this button with the text: 'The 'Add item Number' button was able to be selected after the form was submitted but this did not save'. At the bottom is a 'Save & Continue' button.

Edit patient Details: Selecting 'Change to another patient' did not save the selection

On page 2 of epi-me's Admission Form (Personal Details page), the Edit Patient details popup was not displaying the correct list of patients when the 'Patient Details Change Reason' was set to 'Change to another patient'. The radio button was not showing a list of patients in the account or allowing them to be selected. This issue has now been resolved.

The screenshot shows the 'Edit patient details' popup on the 'Personal Details' page. The 'Patient details change reason' is set to 'Change to another patient'. A dropdown menu is open, showing a list of patients: Anderson, Rachel, Miss (F) DOB: 18/10/1994; MacDougall, Ray, Mr (M) DOB: 25/11/1968; MacSorley, Erin, Miss (F) DOB: 19/07/1984; Nguyen, Michael, Mr (M) DOB: 05/06/1989; and O'Brien, Harry, Mr (M) DOB: 15/10/1959. A red arrow points to the dropdown menu. The background shows the 'Personal Details' form with fields for 'Patient title', 'Patient first name', 'Patient surname', 'Patient date of birth', and 'Patient sex'.

Patient Consent to Receive Marketing Material had the wrong heading

users identified a spelling mistake in the 'Patient Consent to Receive Marketing Material' Report
This has now been corrected

The screenshot shows the EpiSoft application interface. At the top, the EpiSoft logo is on the left, and the user 'Laffey, Justin (epi-me Administrator)' is logged in on the right. Below the header is a red banner with the title 'Patient Consent to Receive Marketing and Fundraising Material'. Underneath, there are search filters: 'Start Date' and 'End Date' with calendar icons, and a 'Facility' dropdown menu set to 'All'. There are 'Search' and 'Export to CSV' buttons. Below the filters is a 'Results' section with a table of patient data. The table has 16 columns: AccountOwner FirstName, AccountOwner Surname, AccountOwner Mobile, AccountOwner Email, AccountOwner PatientRelationship, Patient Title, Patient FirtName, Patient Surname, Patient StreetAddress, Patient Suburb, Patient State, Patient Postcode, Patient PhoneNumber, Patient Mobile, Patient Email, Patient DOB, and Admissi Type. The footer shows '© 2022 - EpiSoft Pty Limited'.

NEW FEATURES:

Added the search option of MRN / UR Number to the patient Search Function

We have added the ability for Administration (hospital) users to search for patients via MRN / UR Number, making it easier to identify patients. Please note that the Facility must be selected first before clicking search.

The screenshot shows the EpiSoft application interface with the 'Patient Search' section highlighted. The top navigation bar includes links for Home, Appointments, Forms, Alerts, User Search, Patient Search, Reports, Communication Centre, and Administration. The 'Patient Search' section has a red header. Below it, there are search filters: 'Facility' dropdown (set to 'All'), 'MRN / UR Number' text input, 'Date of birth' with a calendar icon, and 'Surname' text input. There are 'Search' and 'Clear' buttons. A callout box with an arrow points to the 'MRN / UR Number' input field, containing the text: 'Added MRN/UR Number search to makes identifying and finding patients easier'. Below the filters is a 'Results' section with a table of patient data. The table has 7 columns: #, Last Name, First Name, Facility, MRN / UR Number, and DOB. The footer shows '© 2022 - epi.me by EpiSoft'.

New Question add as an option for Customers Patient Name same as Medicare Card

Using a new form configuration, on the Insurance Page under Medicare Card expiry field we have added a new question "Is the Patient's name the same as on their Medicare Card" with yes and No as options then if No is selected a field for "Patient's name as per Medicare Card". This was added to allow for Patients who have a different name on their Medicare Card to their legal name. This can be turned on via the Insurance Details Form Configuration page using the following:

INCLUDE_MEDICARE_NAME_ON_CARD

I do not have a Medicare card	<input type="checkbox"/>
Medicare card number *	<input type="text"/>
Medicare ID number (number to left of patient's name on card) *	<input type="text"/>
Medicare expiry month and year *	<input type="text"/> <input type="text"/>
	
Above illustrates the Medicare card and explains how the numbers should be entered and the order of entry.	
Is the patient's name the same as on their Medicare card? *	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
First name on card *	<input type="text"/>
Surname on card *	<input type="text"/>

CHANGES: Instructions to patients made clearer for GP search and GP Practice search

On the GP Details page (Page 4 of epi-me's Admission Form), customers have reported that some patients find it hard to understand the prompts to lookup their GP in the GP lookup field, and the GP practice lookup field. the format in which patients need to enter their search have been underlined to make it clearer to patients or users completing the form.

The screenshot shows the 'GP Details step 4 of 6' page for Patient: ABRAMS, Andrea (F) DOB: 20/06/1991. The page includes a navigation bar with 'Home', 'My Profile', 'Welcome Justin', and 'Log off'. The main content area is titled 'GP and Other Provider Details' and contains the following fields and instructions:

- GP name search ***: A text input field with the value 'HING'. Below it, instructions state: 'Please enter your family or regular GP. This information is important as we may need to communicate information about your treatment outcome to them, for example via a discharge summary with post-admission instructions. Results can take a few seconds to load. Search GP last name and select from list. To further refine search, use format LastName, Firstname (include space after comma) for example Smith, G. Other fields will autopopulate once selected however some fields may not autopopulate.'
- GP's first name or initial ***: A text input field with the value 'CLIFFORD'.
- Name of GP's practice**: A text input field with the value 'BALMORAL MEDICAL PRACTICE'. Below it, instructions state: 'Search GP practice name and select from list. Other fields will autopopulate once selected however some fields may not autopopulate. If you cannot find your GP by surname or practice search, tick "I cannot find my GP" above and type in manually.'
- I cannot find my GP**: A checkbox option.

Two arrows point from the text 'Instructions to patients made clearer for GP search and Gp Practice search' to the search instructions for the GP name and practice name fields.
